FORMAL STATEMENT OF MEETING

This document records a project review meeting held by the development team, intended to record reviews mentioned herein. The meeting was convened to discuss updates and refinements to key components of the project. This meeting was particularly focused on enhancing the request manager, procurement, and quotation functionalities. The team decided to add a status bar, which would provide users with a visual representation of the progress and status of their requests. A significant part of the discussion was dedicated to creating a PUT method for handling "solicitud," ensuring that the process was efficient and user-friendly. The team also agreed to modify the form functionalities to allow file uploads, which required updates to the front-end interface to accommodate these changes. By the end of the meeting, the team had made substantial progress in improving both the user interface and the underlying back-end processes.
