FORMAL STATEMENT OF MEETING

This document records a project review meeting held by the development team, intended to record reviews mentioned herein. The meeting was convened to improve existing project features and address several issues that had arisen. The team first discussed the ongoing testing efforts, which were essential for ensuring the project's stability and functionality. A significant part of the meeting involved implementing a GET request to retrieve the authenticated user's profile, which would enhance user-specific functionalities. The team also focused on correcting the "new project" function to ensure that new items were appropriately updated during project creation. Several GET requests were identified as needing fixes to ensure they displayed correctly on the front-end. Additionally, the meeting covered the addition of filtering and state management functionalities. The session concluded with the team setting clear goals for refining both the back-end and front-end aspects of the project to improve overall performance.

NAMES	POSITION
Meiyin Melissa Chang Rizzo	Scrum Master
Diego Andres Martinez Mendia	Development Team
Luis Gabriel Canarte Lucio	Development Team
Samantha Sharid Sanchez Villacreses	Development Team
